Summex Technologies is a full-service Managed Service Provider (MSP) headquartered in New York, specializing in cybersecurity, cloud architecture, IT support, and network infrastructure. Our mission is to help organizations scale confidently through reliable technology, resilient systems, and trusted expertise.

We operate as a true technology partner — not just a vendor — by aligning IT strategy with your business goals.

- 24/7 proactive monitoring and remote support through our U.S.-based NOC

- Microsoft, SonicWall, and CrowdStrike certified engineering team

- Decades of combined experience supporting enterprise and SMB environments

- Nationwide coverage with local presence and rapid response times

WHO WE ARE

We Manage your IT infrastructure — from endpoint security to cloud optimization — allowing you to focus on driving business outcomes. Summex builds technology ecosystems that are secure, agile, and cost-efficient.

- Cybersecurity – Proactive defense against ransomware, phishing, and unauthorized access

- Cloud Services – Microsoft 365, Azure, hybrid cloud design, and license management

- Helpdesk & Support – Fast, knowledgeable support for your users and devices

- Network & Infrastructure – Design, implement, and manage robust and scalable networks

- IT Asset Management – Centralized tracking and lifecycle management of all devices and software assets

WHAT WE DO

Our managed IT services combine automation, analytics, and human expertise to maintain uptime, security, and user productivity. We deliver visibility and control across every endpoint, server, and network component.

- Endpoint and server management through automation and AI

- Microsoft 365 tenant administration, licensing optimization, and compliance controls

- Cloud License Management – Centralized control of Microsoft 365, Azure, and SaaS subscriptions

- IT Asset Management – Device inventory, lifecycle tracking, and procurement planning with automated reporting

- Detailed ticketing and performance reporting

MANAGED IT SERVICES

Cyber threats evolve daily — your defense strategy should too. Summex delivers enterprise-grade cybersecurity services tailored to the size and risk profile of your organization.

- CrowdStrike EDR and Arctic Wolf SOC for endpoint detection and response

- Azure Conditional Access, multifactor authentication, and identity governance

- Email security, phishing simulations, and employee training programs

- Data loss prevention (DLP) and continuous risk posture monitoring

We support frameworks including HIPAA, SOC 2, PCI-DSS, and ISO 27001, ensuring your IT meets the standards required by auditors, partners, and clients.

CYBERSECURITY & COMPLIANCE

Summex architects cloud and hybrid infrastructures designed for performance, scalability, and continuity. Our team helps you move workloads intelligently while maintaining control and security.

- Microsoft Azure deployments with cost governance and redundancy

- Cloud License Management and Optimization across Microsoft 365, Azure, and hybrid environments

- Data center operations in Commack, NY and Austin, TX for business continuity

- SonicWall firewall configuration, SD-WAN, and VPN connectivity

- Wi-Fi 6/7 solutions, IoT segmentation, and site-to-site networking

- Disaster Recovery planning, replication, and Azure-based failover strategies

CLOUD & INFRASTRUCTURE DESIGN

We believe great IT isn't about fixing problems — it's about preventing them. Summex combines enterprise-level technology with personalized service, giving clients the best of both worlds.

- Rapid response and resolution through direct technician access

- Transparent communication and ticket accountability at every stage

- Deep experience in multi-site and compliance-driven environments

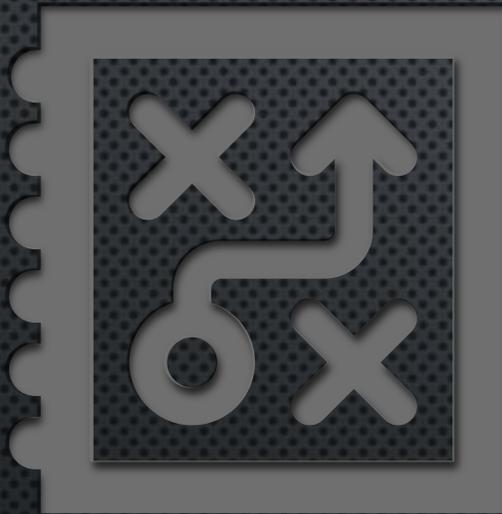

- Scalable, modular services that adapt to business growth

- Centralized cloud license and asset management for cost efficiency and visibility

WHY SUMMEX
